Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-3 and 9-13, drawn to regulating buffer access, classified in class 711, subclass 151.
 - II. Claims 4-8, drawn to memory testing, classified in class 714, subclass 718.
2. The inventions are distinct, each from the other because: claims 1-3 and 9-13 are directed to memory accesses involving different memories, a control unit and a buffer manager while claims 4-8 are specifically directed to testing in relationship to an internal logic circuit using a test register.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

3. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
4. A telephone call was made to Patrick G. Burns on December 2, 2003 to request an oral election to the above restriction requirement, but did not result in an election being made.
5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Reba I. Elmore, whose telephone number is (703) 305-9706. The examiner can normally be reached on M-TH from 7:30am to 6:00pm, EST.
